** Vinyl: **EGB** Midas Gold
* Velvet: **VD** Gold Velvet

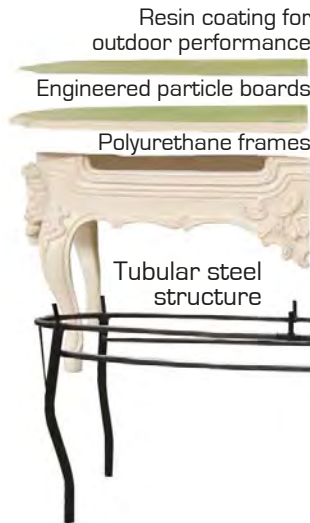

Finish: **NG** Onix Black **NGB**
Vinyl: **WBB** Black Beard
* Velvet: **VN** Black Velvet

Metallics!

100 year old carpentry techniques are combined with cutting edge technologies to create POLaRT pieces.

The soul of your furniture: It's what's on the inside that counts!

All POLaRT pieces contain an inner steel frame to contribute to stability and durability.

Polyurethane frames are detailed, carved, sanded and polished before they undergo paint work which includes an outdoor proof resing coating.

POLaRT's products are customizable to any project (need, style, budget, etc.)

POLaRT OUTDOOR

POLaRT's products are all available in indoor, outdoor, or plastic.

Outdoor items feature upholstery alterations such as smooth upholstered backs and tight-seat cushions to let water run freely.

We install anti-microbial foam and liner over high density cushioning to avoid mould, as well as dry fast foam on the cushions.

To top it off, each outdoor item comes ready to rock and roll with a cover to protect the unit when not in use.

Durability

Polyurethane and metal are our main raw materials. The first is a plastic molded into shape, the latter its internal structure. Combined they form an unbreakable frame.

Weather Resistant

All our vinyls are resistant to water & abrasion and they all stay cool even in full sunlight!

Color Stay technology

We UV-proof our paint to guarantee a long lasting radiance in our colors, even while they remain exposed to harsh climate.
